## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of species I in the reply filed on 10/26/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Accordingly, claims 1-9 are now pending in the application.

### *Double Patenting*

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1 and 2 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 2 of copending Application No. 11/081,523. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2871

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-4, 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamanaka et al., US Patent No. 5,986,729.

Regarding claims 1-4, 6, 8-9, Yakanaka et al. disclose a reflection type liquid crystal display (LCD) device (figure 4) comprising:

- . a first substrate (1);
- . a second substrate (2);
- . a first insulating layer inherently forming over the substrate (according to the active matrix LCD);
- . a reflective layer (9);
- . a second insulating layer (23);
- . a first lower electrode (12);
- . a first upper electrode (17);
- . a third insulating layer (24);
- . a fourth insulating layer (25);
- . a second lower electrode (13);

Yamanaka et al, however, do not disclose a color filter formed over the upper substrate (2). It would have been obvious to one skilled in the art at the time of the invention was made to employ a color filter combined with a Yamanaka's color layer over the first substrate in order to obtain a bright, full color display in an LCD device.

Regarding claim 7, although Yamanaka et al. do not explicitly disclose a thickness of the reflective electrode, such thickness in the range of 50 to 1000 angstroms would have been

Art Unit: 2871

obvious to one skilled in the art at the time of the invention was made in order to reduce a display thickness.

***Allowable Subject Matter***

6. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
